

The champion of the heat resistance

Chinese Turnip APOLLO

Selected on our tropical breeding station in Africa, Apollo has demonstrated its excellent adaptability in warm conditions. Its exceptional precocity offers the possibility to harvest beautiful roots from 40 to 45 days after sowing.

- **ROOT**
- Smooth and regular
- Long and straight
- Length: 25-26 cm
- Diameter: 6-7 cm
- Pearl White uniform
- Firm flesh

- **PLANT**
- Vigorous
- Erected foliage

Thanks to its heat resistance, the taste of the variety Apollo are not written by the high temperatures and the taste is mild.
