

*Our variety for all conditions!*

## Tomate F1 COBRA 26

*Lycopersicon esculentum L.*

First variety of the Technisem range which combines tolerances to TYLCV and to Bacterial Wilt, F1 Cobra 26 insures productivity and fiability to Sahelian and tropical areas producers who have to confront pressures more and more complex. F1 Cobra 26 produces in abundance uniform square fruits. Its firmness insures a very good conservation after the harvest.

### PLANT
