You solution for tomato culture under high temperatures during dry season

Tomato JAGUAR F1

Lycopersicon esculentum L.

This hybrid has been bred for its great adaptation to high temperature during dry season and for the very good firmness of its fruits. Its high level of tolerance to TYLCV assures very good yield, even under strong disease pressure. The plant provides a good quality production even under hot condition, thanks to its robustness.

PLANT

- Determinate
- Vigorous

FRUIT

- Square, uniform shoulder
- Attractive red colour
- Average weight : 100 to 110 gr

MATURITY

- Early : 65 days between transplanting and harvesting

TOLERANCES

- High tolerance to TYLCV (Tomato Yellow Leaf Curl Virus)
- Tolerance to *fusarium* (fol.0)
