

TECHNISEM

High yield and good behaviour under different conditions !

Watermelon KAOLACK

Citrullus lanatus L.

Round fruits of KAOLACK are around 5 to 6 kgs, with a light green skin colour, finely medium green striped. The red flesh colour is crunchy and sweet, well-appreciated by consumers. With a high yield and a good behaviour under different conditions (thanks to a good tolerance to Anthracnose), KAOLACK is famous in subsaharian countries.

FRUIT

- Round shape
- Light green skin colour, finely medium green striped
- Average weight : 5 to 6 kgs

FLESH

- Red
- Smooth
- ° brix : 10-11

MATURITY DAYS

- 80-85 days from transplant to harvest

RESISTANCE /TOLERANCE

- Anthracnose (*Colletotrichum lagenarium*)
