

TECHNISEM

Exceptional according to its performances in hot season

Cabbage MILOR F1

Brassica oleracea L.

This variety has been especially selected for African subtropical area. MILOR F1 is famous for its firmness, its homogenous head formation and its resistance to bursting. It has also a quite flexible use : despite its perfect adaptation to dry and hot season, MILOR F1 provides good results under hot and humid period. Its erected foliage makes it suitable to high density plantations. Thanks to a good resistance to transport, MILOR F1 is the best variety for export.

PLANT

- Erected habit
- Homogeneous head formation

HEAD

- Compact and dense head
- Globular shape
- Good firmness
- Nice deep green
- Average weight : 1.5 to 3 kg

MATURITY

- 60 days from transplanting to harvesting

RESISTANCES

- Good tolerance to Black rot (*Xanthomonas campestris*)
- *Fusarium oxysporum*
- Good resistance to bursting
