

TECHNISEM

New flexible variety providing an excellent productivity under hot conditions.

Squash SAMIRA F1

Cucurbita pepo L.

This F1 hybrid variety has a high early yield. Thanks to its heat resistance, SAMIRA also allows the grower to get a constant indeterminate and generous production even in hard conditions. Its opened shape makes successive harvests easier. Its ability to undergo violent heat increase provides it a good adaptation to tropical growing conditions.

PLANT

- Strong and spaced shape
- Open habit

FRUIT

- Cylindrical
- Slightly fleshy

COLOUR

- Uniform light green
