Tolerance to diseases for high performances in cold season

Cabbage Santa F1

Brassica oleracea L.

This variety has been especially selected for subtropical area. SANTA F1 is renowned for its firmness, its homogenous head formation and its sweet taste. SANTA F1 provides good results in cold season in the whole subtropical area. Its erected foliage makes it suitable to high density plantations. Thanks to a good tolerance to diseases, SANTA F1 is a good reference for growers.

PLANT

- Erected habit
- Homogeneous head formation

HEAD

- Compact and dense head
- Globular shape
- Very good firmness
- Bluish green colour
- Average weight : 2.5 to 3 kg

MATURITY

- 70/75 days from transplanting to harvesting

RESISTANCES

- Good tolerance to Black rot (*Xanthomonas campestris*)
- High tolerance to *Fusarium oxysporum*
- Good tolerance to Downy Mildew (*Peronospora parasitica*)
