

An open-field variety for all year long !

Cucumbre BASMA F1

Cucumis sativus L.

BASMA F1 is an andromonoecious variety which could be grown all year long in good conditions. The variety gives regular, dark green, smooth and short fruits (Beit alpha). Good tolerances to Powdery and Downy mildew are good additional advantages as well.

PLANT

- Good vigor
- Good leaf cover

FRUIT

- Straight and cylindrical
- Ribbed
- Length: 14-15 cm
- Dark green

MATURITY

- 50-55 days from transplantation to harvest

TOLERANCES

- Downy mildew (*Pseudoperonospora cubensis*)
- Powdery mildew (*Sphaerotheca fuliginea*)
